★**Extremal problems for finite sets.**

Papers from the conference held in Visegrád, June 16–21, 1991.

Edited by P. Frankl, Z. Füredi, G. Katona and D. Miklós.

Bolyai Society Mathematical Studies, 3.

*János Bolyai Mathematical Society, Budapest*, 1994. 514 pp. \$100.00.

ISBN 963-8022-81-7

D. M. Acketa and J. D. Žunić, On the maximal number of edges of a digital star-shaped polygon with given diameter (7–23); R. Ahlswede and Ning Cai, On sets of words with pairwise common letter in different positions (25–38); N. Alon, Probabilistic methods in extremal finite set theory (39–57); S. L. Bezrukov, Isoperimetric problems in discrete spaces (59–91); J. Bierbrauer, Small islands (93–110); A. Blokhuis, Extremal problems in finite geometries (111–135); B. Bollobás, Y. Kohayakawa and T. Łuczak, On the evolution of random Boolean functions (137–156); A. R. Calderbank, Algebraic invariants for codes and designs (157–185); D. de Caen, The current status of Turán's problem on hypergraphs (187–197); J. Demetrovics and Hua Nam Son, Databases, closure operations and Sperner families (199–203); A. Derbala and K. Engel [Konrad Engel], Algorithmic investigation of the weighted extremal set problem (205–215); P. Erdős [Paul Erdős], Problems and results on set systems and hypergraphs (217–227); P. Frankl [Peter Frankl] and N. Tokushige, The Kruskal-Katona theorem, some of its analogues and applications (229–250); Z. Füredi and J. Pach, Traces of finite sets: extremal problems and geometric applications (251–282); A. Gyárfás, On a Ramsey type problem of Shelah (283–287); E. Győri, Partitions and covers of rectilinear regions (289–304); J. Kahn [Jeffrey N. Kahn], Recent results on some not-so-recent hypergraph matching and covering problems (305–353); D. J. Kleitman, Extremal problems on hypergraphs (355–374); A. D. Korshunov, Families of subsets of a finite set and closed classes of Boolean functions (375–396); Z. Lonc, Partitions, packings and coverings by delta-systems and hyperstars (397–412); I. Rival and A. Rutkowski [Aleksander Rutkowski], Does almost every isotone, self-map have a fixed point? (413–422); A. Sidorenko [A. F. Sidorenko], An analytic approach to extremal problems for graphs and hypergraphs (423–455); W. T. Trotter, Progress and new directions in dimension theory for finite partially ordered sets (457–477); Zs. Tuza, Applications of the set-pair method in extremal hypergraph theory (479–514).

{The papers are being reviewed individually.}
